

Insulation Tester

CZ20055

Conduct insulation resistance tests at
250V, 500V and 1000V.

- Easy to read analogue display.
- Live circuit warning.
- Illuminated display.
- Meets EN61326 and EN61010-1, CAT III 1000V.
- Hand held or free standing operation.
- Protective carry case

Insulation Tester

CZ20055

The Aegis Insulation Tester is the ideal tool for electricians involved in commissioning, maintenance and testing of electrical installations.

Light weight and easy to use, it provides user selectable voltage outputs of 250V, 500V and 1,000V for MΩ testing. 3Ω and 500Ω testing is available for terminal connections.

A live circuit warning LED is provided to alert the user prior to conducting any testing and the test lock button will hold the last reading in place until it is reset.

Presented in a protective hard carry case with two probe leads as well as a single lead fitted with an alligator clamp which is provided to allow better manoeuvrability when conducting tests.

Specifications

Physical

Dimensions	200mm x 92mm x 50mm
Weight	700 grams Inc batteries
Battery	6 x 1.5V AA Alkaline (included)
Operating Temp.	0° to 40°C
Storage Temp.	-10° to 60°C
Display	Analogue
Measurement Range	3Ω, 500Ω, 100MΩ/250V, 200MΩ/500V, 400MΩ/1000V, 600V/ACV.
Leads	2 x Probe leads 1 x Alligator lead
