

Phase Rotation Tester

CZ20052

Phase rotation testing for electrical systems.

- Large liquid crystal display
- Active phase indication
- Phase rotation indication
- Colour coded leads
- Carry pouch

Phase Rotation Tester

CZ20052

The Aegis Phase Rotation Tester is perfect for confirming the correct phase rotation on electrical installations, pumps, motors and other machines, prior to disconnection and after reconnection. Once connected, it will also confirm that voltage is present on each phase.

Quick connection is made to the test installation via three colour coded (Red, White, Blue) leads with replaceable alligator clips.

Packaged with its own durable carry case, the Aegis Phase Rotation Tester is light weight and easy to use.

Specifications

Physical Dimensions	130mm x 69mm x 132mm
Weight	130 grams
Operating Temp.	0° to 40°C
Storage Temp.	-10° to 60°C
Display	LCD
Nominal Voltage	40 to 690VAC
Frequency Range	15 to 400Hz
Protection levels	CATIII, 600V
Leads	3 x Alligator leads (RWB)
