LTS No2 Linesmans Test Set

The Lines Test Set No 2 is a portable voltmeter/ohmmeter used for testing telephone lines from terminal points such as cabinets, pillars, cable boxes, etc. The set is very user friendly, has a large scale for clear readings and is rugged enough to withstand operating conditions in the field. The set features volts, megohms, kilohms and low ohms, colour coded scale, AC detection, push button line reversal, rotary selector switches, multi flexible test leads, steel framed leather carry case and is built to Telstra and Australian standards (AS1042).

Movement: 100 μ A , DC Volts:

0-80V 10000. per volt \pm 1%, Kilohms: 0 -

5K. \pm 2%, Megohms: 0 - 5M. \pm 2%,

Colour zone use with the megohms scale -

Green = Good, Yellow = Fair, Red = Bad.

Temperature Range: Operating

0 - 40°C, Storage 0 - 60°C, Standard 6F22DP

9V battery powered.
