Test Telephone

CZ20018

The Aegis Test Telephone is designed for use by line installers, repair technicians and other authorised personnel for telecommunications line testing and temporary communications.

Water resistant and feature rich, the Test Telephone operates in Talk, Ring and Monitor modes, each of which is easily selected by the user. The high impedance design protects against disturbing data, voice or signaling.

Added versatility includes reverse polarity indication, last number redial and the ability to store up to 10 frequently dialed telephone numbers.

Fitted with a Multi-Way lead set as standard (Krone, RJ, and clips) the CZ20018 is ready to perform every time.

Light weight and loaded with features, the Aegis Test Telephone is a great tool for occasional and regular users.
